

# Wire Frame

## Products

(FOOTER)

The website will use a clean, cohesive organization that will make it easy for the viewers to go into the site and buy products with the least amount of clicks possible. Also wanted to incorporate different means of payment like PayPal. In addition, though the website will be an in-out site for buying products, I also want to make it a community site as well where visitors can get shouted out with their social media tags (Featured/Feature Me). The links on the top are also going to be drop down, sub-menus (hence the arrows)

General Colors to use
